EDUCATION

January 2022

BTECH in CSE

JNTU-H

SKILLS

- Spring Framework
- Spring Boot
- Spring Batch
- Spring Security
- Restful APIs
- Microservices
- JPA
- Mockito JUnit
- Maven
- Apache Kafka
- Core Java
- MongoDB
- PostgreSQL
- Redis
- Git
- XSLT

PROFESSIONAL SUMMARY

Backend Java Developer with 2+ years of experience in designing and building scalable applications using Java, Spring Boot, Kafka, mongoDB, and PostgreSQL. Proficient in optimizing API performance, handling large JSON transformations, and implementing distributed caching with Redis. Familiar with cloud-native architectures and Kubernetes.

EXPERIENCE

November 2022 - Present

Java Developer

DigitalDots Technologies Private Limited

- Designed and developed RESTful APIs using Spring Boot 3.0 to support CRUD operations.
- Optimized the transformation of OpenAPI and Postman APIs for handling large JSON payloads efficiently.
- Migrated the application from Spring Boot 2.6 to 3.0, ensuring compatibility and improved performance.
- Built a reactive web application using Spring WebFlux, integrated with MongoDB and PostgreSQL.
- Implemented Kafka producers and listeners using Spring Kafka Template for real-time messaging.
- Implemented Kafka producers and listeners using Spring Kafka Template for real-time messaging. Used Javers framework to perform audit tracking for entity changes
- Implemented Swagger Documentation
- Implemented JUnit and Integration tests for various Backend services supporting the DigitalDots flagship platform (Evolve) using Spring Test, Mockito, etc
- Implemented Kafka Producers and listeners using Spring Boot Kafka Template
- Designed service interfaces and databases required for the applications
- Project was to build services that are going to be used for Business 360 solution based on DigitalDots Evolve platform
- Built services for Account Management, User Audit, Notifications, and Logging services using platform foundation libraries and integrated them into the solution
- Built workflows on the platform to support business functionality
- Involved in debugging, troubleshooting and resolving production issues related to Java applications.
